Official announcement of patronage and strategic partnership

Hereby, the «SINNERGEMS» jewelry house and its founder Konstantin Anisimov announce the official patronage of contemporary artist Natalia Vypritskaia and her art project «Fragile States».

This partnership is built on a deep conceptual dialogue between nature, matter, memory, and art, and develops within the framework of the shared concept «Architecture of Earth and Memory».

As a premium jewelry brand dedicated to the search for rare gemstones and the revelation of their unique natural history, we see a profound connection between our activities and the artistic practice of Natalia Vypritskaia. In her large scale canvases, dense multi layered matter, palette knife relief, paints, and texture become a language through which the artist explores the hidden structures of human memory, internal crises, transformation, and the search for balance.

Just as rare gemstones preserve in their structure the traces of natural processes that occurred over millennia, Natalia's painting preserves the traces of human experience, movement, memory, and internal transformation. In this, there is a special connection between natural matter and artistic expression.

As the official patron and partner of the project, «SINNERGEMS» supports the artistic vision of Natalia Vypritskaia and the development of her international exhibition and publishing projects. It is a great honor for us to accompany the «Fragile States» project in its international development and to support this dialogue between the art of nature and the art of canvas, presenting it to a circle of collectors, art connoisseurs, nature and adventure lovers, all those who have dedicated their lives to their beloved cause, as well as those looking for a point of support.

Konstantin Anisimov
